

## PRODUCT SAFETY ASSURANCE STATEMENT

We take this opportunity to confirm that all Homecrest Cascade products are fully compliant with US health and safety standards and more importantly that they are safe and suitable for installation in your home or place or business.

Homecrest Cascade products are some of the safest flooring product options that you can consider installing in your home or place or business; they do not carry some of the risks that can be associated with other types flooring that you may be concerned about, including:

- Volatile Organic Compounds (VOC's): Homecrest Cascade products are 100% VOC free, this also includes the urethane finish used on these products to give them their beautiful finish and enhanced scratch and wear resistance.
- Formaldehyde Off-gassing: Homecrest Cascade products are 100% formaldehyde free.
- Ortho Phthalate Plasticizers: Homecrest Cascade products are 100% Ortho Phthalate free.
- Heavy Metals: Homecrest Cascade products are made with virgin PVC to ensure that they are 100% heavy metal free.
- CARB-2 Compliance: Homecrest Cascade products meet and exceed all CARB-2 compliance requirements regarding national air quality and health and safety standards.

When you sell a Homecrest Cascade floor, you may rest assured that you are selling beauty, safety and quality in one box. Equally important, you are selling your valued customer a floor that will provide them with many years of exceptional performance, durability and customer satisfaction, appearance, condition and quality.
